

$$\frac{1}{\dim(\mathcal{C})} \sum_{j,k \in \mathcal{O}(\mathcal{C})} d_j d_k$$

=

The diagram illustrates an equality between two expressions. On the left, a sum over pairs $(j, k) \in \mathcal{O}(\mathcal{C})$ of the product $d_j d_k$ is shown. To its right is a bipartite graph with two nodes, φ and φ^* . Node φ has outgoing edges labeled $V_1, \dots, V_n$. Node φ^* has incoming edges labeled $V_n, \dots, V_1$. There are two edges between φ and φ^* , labeled X_j and X_k . On the right, the sum is over $i \in \mathcal{O}(\mathcal{C})$ of d_i . The corresponding graph has the same nodes and external edges, but only one edge labeled X_i connects φ and φ^* .
