

$$\frac{1}{\dim(\mathcal{C})} \sum_{j,k \in \mathcal{O}(\mathcal{C})} d_j d_k$$

=

The diagram illustrates an equality between two expressions. The left side is a sum over pairs $(j, k) \in \mathcal{O}(\mathcal{C})$ of the product $d_j d_k$, scaled by $1/\dim(\mathcal{C})$. The right side is a sum over $i \in \mathcal{O}(\mathcal{C})$ of d_i . The diagrams show two bipartite graphs between nodes φ and φ^* . The left graph has multiple edges X_j and X_k between φ and φ^* , with φ connected to $V_1, \dots, V_n$ and φ^* connected to $V_n, \dots, V_1$. The right graph has a single edge X_i between φ and φ^* , with the same connections to $V_1, \dots, V_n$.
