

A diagram showing a vertical line with a loop, labeled 'A' at the top, followed by an equals sign.

The diagram shows an equation for the propagator of a free fermion. On the left, a vertical line is labeled A at its top. In the middle, a vertical line is labeled B at its top. On the right, a vertical line is labeled B at its top. An equals sign $=$ is placed between the middle and right diagrams. The middle diagram is a vertical line with a small loop (a bubble) on its right side, representing a self-energy correction.
