

Diagrammatic equation for the identity on V_+ :

A vertical line with a loop (representing a contraction) is equal to a straight vertical line. The corresponding algebraic expression is:

$$(V_+ \rightarrow V_+ \otimes V_- \otimes V_+ \rightarrow V_+) = \text{id}_{V_+}$$

Diagrammatic equation for the identity on V_- :

A vertical line with a loop (representing a contraction) is equal to a straight vertical line. The corresponding algebraic expression is:

$$(V_- \rightarrow V_- \otimes V_+ \otimes V_- \rightarrow V_-) = \text{id}_{V_-}$$
